Final Mark (15% out of total grade)

EECS 4413 – Deliverable 1 Report		Mark
Quality of Conceptual Architecture		/80
Detailed descriptions of high level architecture		
Descriptions of services and interactions		
Important architecture styles and design patterns identified		
Test Coverage		
Illustration using use cases, sequence diagrams, components diagrams		
Analysis and comparison of alternative architectures		
Justification of chosen architecture (including discussion on coupling and cohesion)		
The degree in which the report reflects the assignment requirements		
Interfaces		
Adequate project plan		
Adequate discussion on AI use in the project (strength and weakness), if AI was used		
<i>Additional Comments:</i>		
Quality of the Written Report		/20
Abstract given a clear overview		
Good report organization break down		
Clear diagrams and tables with captions		
Diagrams and tables are explained in the text (Diagrams have legends)		
Consistency (box names, legends, etc) among different views of the model		
References inserted where necessary		
Document is proofread and within page limit		
Use of fonts is consistent across the document		
Screenshots of UML diagrams with readable fonts, edges and arrows		
Good subsystems layouts (no overlapping of subsystems, or small number of edge crossings)		
<i>Additional Comments:</i>		
Late Penalty or Failure to Ack the use of AI(if used)		0
Total		/100
